The Psychic Gambling Supersystem

Synopsis

If you think luck is random, THINK AGAIN! Human beings possess a subtle energy field that envelops the physical body. When activated, it is capable of manufacturing luck and producing remarkably accurate powers of intuition and foresight. Beneath the deceptive fabric of everyday reality, energy fields continually wage wars to determine who "gets lucky." Those that possess naturally gifted energy fields (such as world class poker players Phil Ivey and Daniel Negreanu) cannot be defeated with skill alone. So the question becomes, "How can YOU develop and use this psychic energy?" • THE PSYCHIC GAMBLING SUPERSYSTEM provides the answers. Author Sunil Padiyar offers an engaging study of both the scientific and spiritual aspects of luck, intuition and foresight, all while taking the reader on a riveting journey from the modern theories of Quantum Physics ("God does not play dice!" said Albert Einstein, only to realize later that he was wrong) to the metaphysical theories in the ancient scriptures of the Hindu Upanishads (written as far back as in the first millennium BC). The author recounts authentic stories to describe his own mystic beginnings in a strange and remarkable land, and reveals the intriguing experiences that led to his personal discovery of the principles on which the book is based. He then presents his three-part Supersystem, designed not only to allow you to win more often in games of chance, but to improve your psychic abilities in all aspects of life. Each component of the Supersystem is explained with step-by-step instructions, illustrations, and examples. The final four chapters of the book focus on practical application, and give you the specific techniques you need to harness your psychic powers for winning at poker, blackjack, slots, craps, keno, lottery, horse racing, and other games of chance.

Customer Reviews

I bought this book on my iPhone! It is so cool! I used the Kindle reader for the iPhone. The pictures and illustrations show up nicely on the iPhone. I saw a post on this book mentioned in a poker forum. Psychic what??? I have read psychic books in the past about trinkets and amulets and such but that is bogus. I wondered if this was one of those shoddy books that asks you to wear pink underwear and carry a fig leaf in your pocket. Also, I am very leery of self-published books. Low quality stuff, that suspect authors peddle to make a quick buck. I can assure you that this book is very well written. The psychic spiritual stories are beautiful and the language and composition are superb. The book brings together many different things in a neat package. It is the law of attraction working in association with energy centers in the body that are called chakras and the system is activated through the use of mantras. Some suggestions and techniques (supposedly from thousands of years back) seem so outlandish; I thought they just might work! You would literally laugh at these techniques if not for the believable extremely convincing narrative by the author, and various scientific studies he cites to support his theories. I know that even though poker players claim to be rational many are extremely superstitious. Why, that famous poker player that won the World Series (Johnny Chan?) carried an apple around with him because he thought it brought him luck? I heard that Phil Ivey once stormed out of a casino when he felt that the dealer had bad vibes and was bring him bad luck. I suggest that they read this book and perhaps it is their energy field that is messed up and needs help and not carry a silly apple or cuss at the dealer!
