## Customer Reviews

Arnett wrote this whole textbook and included pictures of his own children throughout. The book ventures into different theories of human development, and splits up life into different developmental stages. It starts with conception and ends with the afterlife. I loved the chapter on emerging adulthood (ages 18-25). It is written for Millennials, those who are currently in between high school and a career, but still don't feel like adults.

The book is what it is. It's not for fun reading. BUT I will say that this book has an odor to it. I don't know what happened to it before I got it in my hands. I can't get rid of it. Have had the book for a month. I can't read it without getting a headache from the smell. It smells like it has sat in a trunk of a car for a year, but still more pungent. Would recommend getting this book from your bookstore if possible. Or having a way of returning it. This stinks.

I read this book as a class requirement but in the end it was put together beautifully and it was informative on many levels. A bit pricey for a college student.

It was the text that the professor used and I'm glad I purchased it. I got an A in the class.

Great an informative book. Came in excellent condition.

Book was in perfect condition. Love it.
