Customer Reviews

The only thing consistent about MS is its inconsistency...in other words, no two people will have the same journey with this devastating disease. Quite often the medical community, who is keenly aware of the variable nature of MS, will still offer the "one stop shopping" approach to its treatment and management. Anyone living with MS, like myself, can certainly attest to the idea that we need options to find what fits our specific disease, even as it varies in our lifetime, as well as our lifestyle. Daryl has done what many health professionals can't do...he has given us options. He has told his inspirational story in very frank terms. He has been very honest about his successes and his less-successful attempts at managing his MS. He has explained what has worked from him, regarding diet, exercise, lifestyle changes and even conventional as well as complimentary medicines. In addition he has offered us other options, that although they may not have been the right fit for him, has been known to have helped others. Daryl knows full well that we each respond to different approaches and that it is important to find strategies that do fit into your life in order to adhere to your regime successfully; it is therefore important to consider all available choices to really find what works for us individually. Daryl never preaches or judges, proclaiming that his method is the perfect fit for the reader...instead he offers his own experience as an example of how one can tailor their own program to their needs. In this regard, the book is a practical and user-friendly guide to potential management paths for anyone living with MS.
