Bone Cancer: Your Way Forward

Synopsis

You will never cure anything if you don't do something about the underlying cause. This applies to every illness including bone cancer. In my book "Bone Cancer: Your way forward" I explain why it may have developed, giving you something to do to change the underlying causes and bring things under control. It could be bad eating habits, a poor immune system, infections, too many antibiotics, toxic chemicals, geopathic stress, an injury to the area where cancer developed and certainly stresses of everyday life affecting your emotions. When cancer declares itself, it could have been developing for ten or fifteen years. All of this is explained to you in detail as though you are with me in my consulting room. I then give ideas on how to change your life style, remove the causes, cope with stress and undo all the harm that life has had on you over the years. You take charge of your life. You take control for yourself. It can work as it has worked for thousands of people.
